PLANSTUDIO DIGITAL CARTOGRAPHIC DATA IN GIS

Tomáš Kalenský

PLANstudio, spol. s r.o.

Abstract

The presentation will introduce the digital cartographic data of PLANstudio company with an emphasis on a detailed map of the Czech and Slovak Republic at a scale of 1:10.000 and the routing data for route planning for cars, cyclists and tourists. In another part of the presentation we will show a possibilities of data-formats, used colors and map legends combinations and the benefits of a combination of raster and vector formats. There will also be demonstrations of cartographic data in the current applications and use of digital cartographic data on mobile devices - smartphones, navigation devices, PDAs or tablet devices. In conclusion, we describe a system for creating and updating data by our cartographers.
