MOBILE GIS FOR EVERYONE - SURVIMOBILE 1.0OGRAPHY

David Pěcha, Libor Mikloš

MAPsteel s.r.o.

Abstract

Practical mobile application SurviMobile 1.0 for PDA uses the GPS positioning system for mobile data collection. The starting point in developing of this application is simplicity and speed of data collection in the field. The application is developed for mobile systems WinMobile 6.0 and higher. Primarily, the application was developed as a complement to the road system GPK (Global roads passport), but its simplicity and practicality makes it possible to use it to a wide range of clients.
