ARCDATA PRAHA OFFERINGS IN THE FIELD OF GIS SERVICES

Petr Urban

ARCDATA spol. s r.o.

Abstract

ARCDATA PRAHA, s.r.o. as an Esri Distributor does not provide only the software distribution but also offers a variety of services to support Esri users and their needs to successfully implement GIS technologies in their organizations. The key consultancy services we provide are: - pre-project analysis, - architecture design, - migrations and upgrades of the systems, - optimization of the systems and workflows, - implementation of the INSPIRE directive. The GIS projects we implemented recently were focused on: - enhancing the GIS application on the regional government level, - building new intuitive web GIS applications using modern web technologies, - data processing and passportization applications on the large cities level, - integration of Geoportals built accordingly to INSPIRE directive, - integration with cadastral data and cadastral IS - data gathering, analysis and evaluation in the field of environmental protection In project management and GIS implementations we cooperate with a long list of satisfied customers. Beginning with large utility companies up to the smallest local government offices we guarantee to our clients professional approach focused on results and long term relationship. Our solutions are based on modern GIS and IT standards and use the full potential that Esri technology offers. To learn more, please visit our webpages: www.arcdata.cz
